

PRAGUE - VIENNA GREENWAYS

Prague–Vienna Greenways (Prague section)

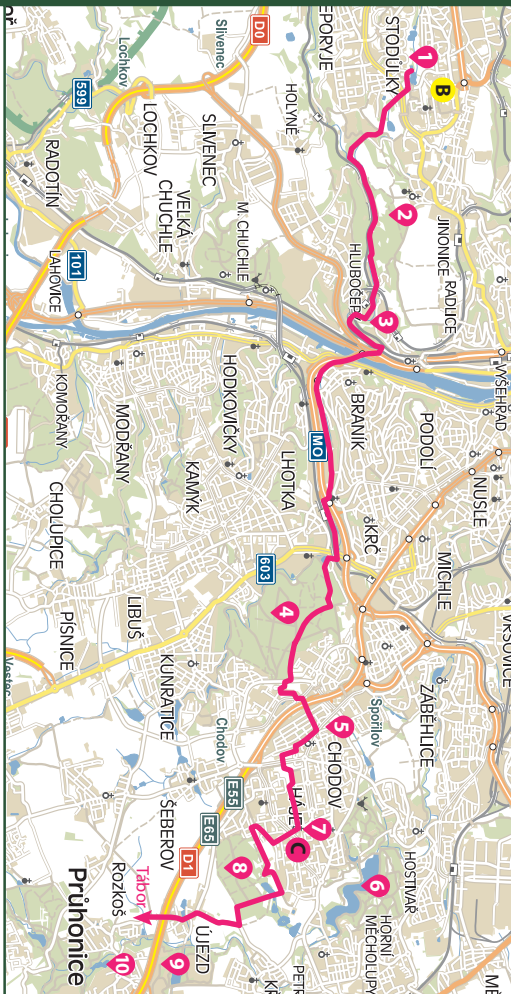

Prague–Vienna Greenways is a 470 km-long network of biking and hiking trails connecting the two historic cities. The starting point is Central Park in **Prague 13**. The route continues through the Prokop Creek Valley along the trail A12 through Hlubočepy to Barrandov Bridge where it crosses the Vltava River to **Prague 4**. The greenway then follows the biking trail A22 through Michelský Forest to Central Park in **Prague 11**, then through Milíčov Forest to **Újezd u Průhonic**. Here, the greenway leaves Prague and continues along the route 11 via Průhonice towards Tábor. (www.prahaviden.cz or www.pragueviennagreenways.org)

The 23 km-long Prague section of the long-distance Greenway will take you through attractive nature areas along rivers and creeks. The greenway serves cyclists as well as pedestrians. It is built mostly on separate trails or roads with little traffic. The head of the greenway can be best reached by bicycle and metro (start: metro B – Hůrka, finish: metro C – Háje). Bicycle transport on Prague metro is free.

The Prague biking map and further information on biking and smart mobility in Prague is available at cyklo.praha.eu.

| 3 Prague railway Semmering | 6 Hostivař water reservoir | 9 Dendrological (Tree) Garden | C Metro C – Háje |

Czech Greenways and Cyclists Welcome

The idea of greenways as a way to facilitate a unique cultural and environmental experience and exchange between visitors and residents along the way was brought to Czechoslovakia in 1991 by a Czech-American Lubomír Chmelař from New York. Greenways are green corridors for recreation and non-motorized commuting. They use paths along rivers and creeks or former railways. Czech Greenways together with its cycle-friendly service certification **Cyklisté vítáni** (Cyclists Welcome) are managed by Nadace Partnerství foundation. In Prague, you can also bike or hike additional Greenways such as the **Botič** and **Rokytká Greenways** along attractive creeks, and the **Vítkov rail-trail** in the city center. More info at www.greenways.cz.
